DETAILED ACTION

Response to Preliminary Amendment

This Office Action is in response to applicant's preliminary amendment filed on November 20, 2003. Claims 1-4 have been cancelled. Claims 5-19 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 5-13 and 16-19, drawn to a cannula assembly, classified in class 604, subclass 164.11.
- II. Claims 14 and 16, drawn to a seal assembly, classified in class 604, subclass 167.06.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 5 does not set forth the details of the subcombination to the same extent as set forth in claim 14. The subcombination has separate utility such as the seal member would require at least one fabric layer and resilient material.

Art Unit: 3743

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

During a telephone conversation with Mr. Michael Switzer on December 7, 2005 a provisional election was made without traverse to prosecute the invention of Group I, claims 5-13 and 16-19. Affirmation of this election must be made by applicant in replying to this Office action. Claims 14 and 15 have been withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Terminal Disclaimer

The terminal disclaimer filed on December 7, 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,702,787 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in amendment filed on December 7, 2005.

The application has been amended as follows:

Cancel claims 14 and 15.

Allowable Subject Matter

Claims 5-13 and 16-19 allowed.

The following is an examiner's statement of reasons for allowance: the art of record when considered alone or in combination neither renders obvious a cannula assembly for use in a surgical procedure, which comprises: a cannula member defining a longitudinal axis, the cannula member defining a longitudinal opening therethrough for passage of a surgical instrument; and a

Art Unit: 3743

sealing member extending across the longitudinal axis and having a predetermined shaped prior to insertion of the instrument, the sealing member comprising a fabric, the sealing member having an hourglass defining an aperture for the receipt of the instrument and arranged so that the insertion of the instrument causes the sealing member to resiliently contact the outer surface of the instrument to form a substantial seal therewith.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
